

Life scientist meetings start in Hyderabad with CCMB and UoH's conference

Hyderabad, 14th Sept, 2022: Around 350 scientists have come together in Hyderabad for an international conference organized by CSIR-Centre for Cellular and Molecular Biology (CCMB) and the University of Hyderabad (UoH). From 14-16 September, the scientists will discuss cutting-edge developments in reproductive biology, endocrinology, and the development of organisms. This will span the fundamental understanding of living cells and tools to address diseases and other challenges. The conference delegates include a large number of Ph.D. students and young researchers across India.

The conference is organized as the 39th annual meeting of the Society for Reproductive Biology and Comparative Endocrinology. The conference started with CCMB Director Dr Vinay Nandicoori welcoming the delegates. He said, "The conference covers a wide range of talks by excellent scientists and presents a tremendous opportunity for all students to learn from accomplished scientists." Prof BJ Rao, Vice-Chancellor, UoH, was the Chief guest for the inauguration and delivered the keynote scientific address at the conference.

Dr. Umapathy, Senior Principal Scientist at CCMB, said, "This is the first in-person conference happening on this topic in India after the COVID-19 pandemic hit. The excitement among the participants is palpable. We really hope this conference will offer a platform for many scientists to discuss their work, and find mentors and collaborators."
